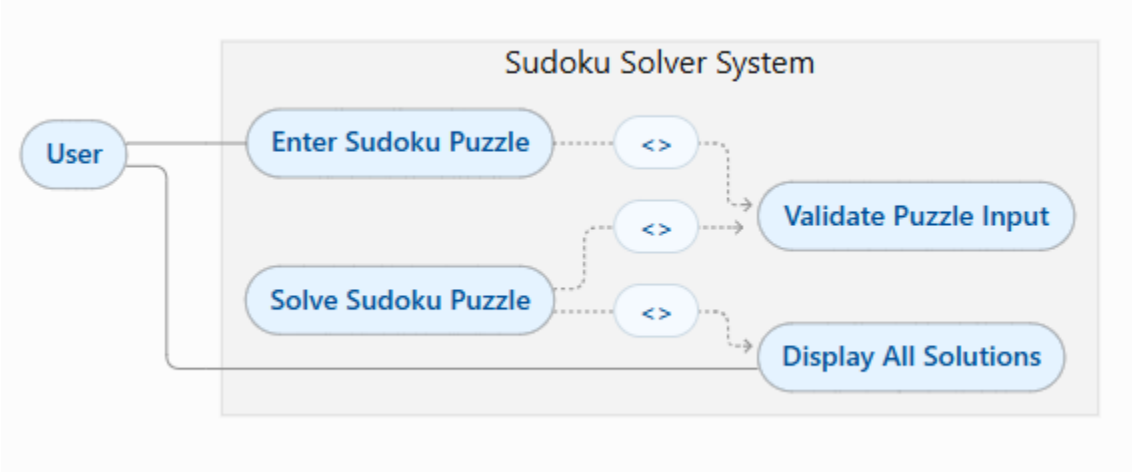
Assignment 4 Use Case Diagram

Fabian Gonzalez

October 15, 2026



Identifiable use cases for the diagram above are enter sudoku puzzle, validate puzzle input, solve sudoku puzzle, and display all solutions.

- Enter Sudoku Puzzle - refers to the input from the user where they insert one of the text files to be viewed and solved through the solver system.
- Validate Puzzle Input - determines if the given puzzle is able to be solved, whether that be the correct number of columns and rows, or the proper numbers and symbols for the grid, and returns otherwise if there is any known error.
- Solve Sudoku Puzzle - allows for the algorithm to calculate any possible solution(s) for the puzzle and return if there are any and its solutions.
- Display All Solutions - returns the possible solutions for the Sudoku Puzzle back to the user.
